

MODIFICATION OF THE TERMS OF THE 2023 CALL FOR PROPOSALS OF THE JAE Chairs PILOT PROGRAMME

On July 18, 2023, the Fundación General CSIC opened the 2023 call for proposals for the **JAE Chairs pilot programme** in order to promote the scientific excellence of the CSIC through a JAE Chair grant for the close collaboration of an internationally renowned researcher with one of the CSIC's research institutes or national centres.

On April 1, 2024, the Fundación General CSIC published the **resolution of the call**, awarding the following proposals *ex aequo* as beneficiary candidates of the 2023 call for the JAE Chairs pilot programme:

Project	Coordinator
ALLCRYO	José María Valpuesta Moralejo
DOMMINO	Mariano Campoy Quiles

On July 10, 2024, the **need to modify point 10. Commitments linked to the receipt and implementation of the grant**, of the Terms of the call is noted, as follows:

- The following paragraph is deleted: "*Assume that the CSIC is the owner of the industrial property generated within the framework of the JAE Chair project, without prejudice to the recognition of its authorship and the rights that the regulations recognise for inventors in terms of industrial property*".
- The following paragraph is added at the end of the section: "*The Fundación, the CSIC, the Chairholder's home institution, the Chairholder and the Coordinator will sign a grant acceptance document, regulating the conditions thereof, including intellectual and industrial property rights, dissemination and publications, regarding the project results.*"

However, this modification, once made, does not affect the integrity of the rest of the Terms of the 2023 call for the JAE Chairs pilot programme nor the effects of the resolution of the 2023 call.

This modification will be notified to the beneficiary candidates.

In Madrid, on the date of signing

Ramón Torrecillas San Millán
Director General of the Fundación General CSIC
